Lavoro, Sociale
e Formazione Professionale

Prot.: 119536

Treviso, November, 16, 2011

To General Secretary
Dott. Marco D'eredità
Camera di Commercio di Treviso

Piazza Borsa, 3/B
31100 Treviso

**Object: Student Company Project -“Leonardo da Vinci” Programme -
LLP/LDV/TOI/09/IT/0494.**

Dear dott. D'Eredità,

the Province of Treviso has long since enabled actions to develop entrepreneurship among young people through promotion, training and economic incentives. More specifically, the Sector Labour, Social and Professional Training of the Province of Treviso has participated and participates in projects financed by the European Community that promote the ability of young students to develop new business ideas.

Among these, is going to be concluded the “Student company” Project, above mentioned, funded under the Leonardo da Vinci, Lifelong Learning Programme, of which the Treviso Province has been the lead partner.

The main aim of the “Student Company” Project is to prepare young people to succeed in a global economy, trying to develop, within the education system, long-term projects concerning Entrepreneurship. All this will help to strengthen the attitude of students to acquire entrepreneurship and self awareness.

Specific aim of this Project is instead the transfer of the norwegian model to the Partner Countries. This model, thanks to legislation which supports it, provides for the establishment of a real “Student company” at school.

In the development of activities of the aforementioned Project, the Province has had, among others, the cooperation of the Chamber of Commerce of Treviso and, in the specific, of the service “Undertake” (“Intraprendo”).

This administration, on the basis of the Project, believes that the collaboration with the Chamber of Commerce has been very fruitful for the achievement of the planned objectives.

For this reason, intends to request the availability of this esteemed Chamber to collaborate and support, in particular through the service “Undertake”, with this Organisation in the next steps that will be born thanks to the “Student Company” Project.

Trusting in a positive feedback, yours faithfully
